AQUATORNADO TECHNOLOGIES INC.

Partner Brief: UAE and the Gulf

A water-based wellness platform for premium hotels, spas, clubs and residences

AquaTornado is a wellness technology company. We are opening our first flagship studio in Dubai and are now building partnerships with hotels, spas, wellness and fitness clubs, residential developers, distributors and sports organisations in the UAE and across the Gulf. This brief explains the platform, our plans for the region and how we work with partners.

70+
venues have installed the core technology since 2010

16 yrs
of use by independent operators

30–60 min
bookable, operator-led sessions

Gulf
Dubai flagship, with sales across the region

The platform

AquaTornado combines warm-water immersion with underwater vacuum-vortex massage in a professionally operated bath platform. The guest rests in warm water while a trained operator works progressively across selected areas of the body, controlling pace and intensity throughout. The result is a calm, private and highly personal experience focused on relaxation, physical comfort and body care.

Personalised

Each session starts with a short discussion of the guest's preferences and routine. Water temperature, intensity and focus areas are then adjusted to their comfort and feedback.

Consistent

AquaTornado Protocols give every certified operator the same structure, so guests receive the same quality in every partner venue.

Flexible

Sessions can focus on selected areas, such as the back and shoulders or legs, or follow a whole-body sequence. Programmes suit active clients, busy professionals and guests seeking regular body care.

Non-medical wellness

AquaTornado is offered as a wellness and leisure experience. It makes no claims to treat injuries, accelerate healing or replace medical care.

30 minutes
A focused session for selected areas; easy to add to a hotel stay, training day or busy schedule

45 minutes
A broader sequence covering several areas according to the guest's preferences

60 minutes
An extended, unhurried whole-body experience; packages and memberships available for regular guests

What we are doing in the region

A Dubai flagship studio

Our flagship will be a showroom, training centre and live operating site. Partners can experience sessions, see the platform working commercially and train their teams there.

Partnerships across the Gulf

Dubai is our base, not a boundary. We will work with partners across the UAE, Saudi Arabia and the wider GCC, and with distributors in international markets.

Strong marketing behind every venue

We will build demand through social media, wellness creators, elite athlete ambassadors, flagship events and international wellness exhibitions. Partner venues benefit directly from this visibility.

Sport and events

We plan to work with athletes, clubs and federations, including on-site recovery sessions at competitions and events.

How we work with partners

Operator partners

Hotel and resort spas, wellness and fitness clubs, day spas, private clubs

The partner acquires the platform and offers AquaTornado sessions to its guests and members, supported by our network services.

Residential and development partners

Developers of branded and premium residences, hotel projects, interior and wellness designers

AquaTornado is specified at the design stage as a bookable residents' amenity, with site planning built in from the start.

Distribution partners

Established wellness, spa or hospitality equipment companies

Territory partners sell, install and support the platform under agreed targets and service standards.

Sports and event partners

Federations, professional clubs, academies and event organisers

Recovery and relaxation sessions for athletes at training bases, competitions and events.

What every partner receives

✓ **Site assessment and planning**	Review of space, water supply, drainage, electrical provision and maintenance access, with a layout recommendation
✓ **Installation and commissioning**	Delivery, installation, testing and handover of the platform
✓ **Operator training and certification**	Training of the partner's staff in AquaTornado Protocols, with annual recertification
✓ **Service and maintenance**	Scheduled servicing and technical support to keep the platform available for bookings
✓ **Protocol licence and updates**	Access to AquaTornado session protocols, programmes and future updates
✓ **Marketing support**	Brand materials, listing as an AquaTornado venue, and inclusion in campaigns and events
✓ **Performance insights (optional)**	Analytics on bookings, utilisation and guest feedback to help the partner grow the service

Next steps

1. **Introductory meeting**
   We discuss your venue or project, your clients and the partnership model that fits.
2. **Experience the platform**
   A demonstration session for your team at our Dubai flagship once it opens.
3. **Site assessment**
   Our team reviews your space and technical requirements.
4. **Proposal**
   A tailored proposal covering equipment, services, training, marketing support and launch timing.

Let's bring AquaTornado to your venue

Partnerships across the UAE, Saudi Arabia and the wider GCC
